Chenikov, V. V. and Tsonev, L. K.
INVESTIGATION OF THE AROMATIC SUBSTANCES OF TOBACCO [1962] 7p. 8 refs.
Order from OTS or SLA $1.10 63-10669

Trans. of Tabak (USSR) 1962, v. 23, no. 3, p. 49-53.

DESCRIPTORS: *Tobacco, *Odors, Smokes, Smell

The aromatic properties of tobacco depend principally on the carbonyl-alcoholic fraction of the benzene extract from tobacco. This fraction probably consists of five high molecular weight substances, insoluble in syrupy phosphoric acid and non-volatile with steam. It is very probable that one of these substances is an aldehyde, three of them are ketones containing the phenanthrene nucleus in their molecules, and one is a high molecular weight monohydric unsaturated primary or secondary alcohol.
